Analyze Power BI Dashboard Performance Using Performance Analyzer

Step 1: Open Performance Analyzer

Step 2: Start recording and refresh

Step 3: Analyse

- Review the recorded performance information for individual visuals.
- Identify which visuals take more time to load.
- Compare the execution times to understand dashboard performance.

Analysis:

Slowest visual: Count of Profit Category by Category – 1290 ms.
Other slower visuals: Total Sales by Category – 1287 ms and the combined ProductName chart – 1287 ms.
Fastest visual: Total Sales by City – 1126 ms.
